

BUILT FOR SECURITY CONSULTANTS

SecurityScope AI for Consultants

Design review. Specification compliance. RFIs and addenda. A coordinated project release.

SecurityScope AI helps consultants manage the entire security design workflow — from early review through RFIs, addenda, and final handoff — so projects move faster and with greater clarity.

Pinecrest K-12 Addition Updated Jun 20, 2026	Review addendum 1 draft addendum

Questions / RFIs
Manage consultant-led clarifications.

Track owner inputs, bidder responses, and addenda status with built-in workflows.

OPEN RFIS
Consultant-managed responses

Please confirm whether Mercury LP controllers from another Mercury LP controllers may remain where cabinet condition is acceptable. Needs Owner Input

Access control hardware - NorthBridge Integrators
Spec: 28 13 00 Drawing: AC-401 Due: Jun 13, 2026

Allowed only where documented condition, power, and downstream board compatibility are verified.

- Owner input required: Yes
- Addendum required: Yes
- Bidder response status: Pending publication
- Internal consultant note: Coordinate with owner team.

Addenda Workflow
Create, track, and publish addenda.

Draft and manage addenda language, track sources, and maintain version history to keep all stakeholders aligned.

ADDENDA BUILDER
Drafts and published issuances

Addendum 02 Drafting
Clarifications to access control locations, door hardware revisions, and head-end notes.
Source: RFI responses + drawing revisions
Status: Drafting

Addendum 01 Published
Updated opening counts, riser references, and owner standards appendix.
Source: Door schedule reconciliation
Status: Published

From design review to project release.

SecurityScope AI helps consultants deliver compliant, well-coordinated security designs with less manual work and greater confidence.
