

BUILT FOR INTEGRATORS

SecurityScope AI for Integrators

Move from intake to handoff with clarity, coordination, and confidence.

SecurityScope AI helps security integrators manage every project – from initial intake and design through installation, commissioning, and handoff – with the intelligence, structure, and collaboration you need to deliver consistent, profitable outcomes.

Everything integrators need to deliver successful projects

SecurityScope AI unifies people, documents, vendors, and workflows so you can move faster with fewer risks.

Readiness Engine

Track project readiness from design through handoff with AI-powered analysis, risk detection, and clear next steps.

- Identify blocking items
- Monitor readiness by phase
- Get AI recommendations

BOM / SOW / Quote Workflows

Create and manage BOM, SOW, and Quote deliverables with structured workflows and review cycles.

- AI-generated draft content
- Version control and approvals
- Align with readiness requirements

Intelligent File Storage

Keep all project files organized, searchable, and connected to the right workflows.

- Auto-organize by project phase
- Search with natural language
- Link files to BOM, SOW, and review questions

Progress Awareness

See real-time progress across design, procurement, installation and handoff with clear visibility into risks and blockers.

- Track completion by stage
- Surface at-risk items early
- Keep projects on schedule

Project & Team Communication

Keep internal teams, customers, and vendors aligned with project chat, comments, and AI-assisted updates.

- Centralized project chat
- Track decisions and action items
- Reduce email sprawl

Third-Party Integrations

Coordinate with manufacturers and vendors, track submittals, and manage third-party requirements.

- Track vendor deliverables
- Monitor submittals and approvals
- Maintain credentials and documentation

Action Center

Get a prioritized view of what needs attention across all projects, from open questions to blocking items.

- AI identifies critical actions
- Consolidated view across projects
- Never miss a handoff requirement
