[Watch Overview](#)

- Stronger partner performance
- Faster, more predictable handoffs
- Greater visibility across your channel

1 Partner readiness

Vendor	Region	Active Projects	Readiness	Status	Last Activity
Crestline Security	Northeast	8	92%	Active	Mar 10, 2026
Meridian Installations	Southeast	5	78%	At risk	Mar 9, 2026
Pioneer Integrated	Midwest	4	86%	Active	Mar 8, 2026
Ridgeway Systems	West	6	95%	Active	Mar 7, 2026
Valley Security Group	Southwest	3	67%	Needs attention	Mar 6, 2026

From pursuit to handoff, with confidence.

SecurityScope AI helps manufacturers enable partners, reduce risk, and accelerate successful deployments.

Vendor Management
 Track partner readiness, performance, and coverage across your channel.

Progress Awareness
 See real-time project status, risks, and next actions across all deployments.

Ask SSAI
 Get governed answers, comparisons, and draft documents from your product and project data.

BOM / SOW / Product-fit
 Validate product selection, BOMs, and SOWs for accuracy and alignment.

Executive to Technician
 Unify visibility for every role — from executives to field teams — on the same trusted data.

ASK SSAI
Product intelligence
 Compare products, check compatibility, and get governed recommendations from your data.

3 Product-fit answers

[Camera Compatibility](#) | [BOM Review](#) | [Product Alternatives](#) | [SOW Draft](#)

ASK A QUESTION
 Compare the CX-500 and VX-300 cameras for this project and recommend the best fit for a warehouse environment. [Ask](#)

Product comparison

	CX-500	VX-300
Resolution	5MP	4MP
Low-light performance	Excellent	Good
Indoor/Outdoor	Indoor/Outdoor	Indoor
AI analytics	Yes (standard)	Yes (optional)
Recommended for	✓ Best fit	Suitable

Built for every stakeholder in manufacturing.

SecurityScope AI unifies your teams, partners, and data to drive consistent, successful deployments.

Channel Sales
 Win with qualified, ready partners.

- Track partner readiness
- View project risks
- Accelerate handoffs

Product Management
 Ensure product fit in real deployments.

- Validate BOMs and SOWs
- See real-world usage
- Capture field feedback

Channel Managers
 Drive partner performance at scale.

- Monitor vendor health
- Identify at-risk projects
- Standardize deployment process

Field & Technical Teams
 Get the right information to deliver successfully.

- Access approved documentation
- Confirm product compatibility
- Resolve issues faster
